

POWER BI ASSIGNMENT 2 – REDAX & DATA VISUALIZATION

This Power BI project successfully processes e-commerce data by building structured data relationships and creating custom calculated columns (Category Type, Revenue Order) along with key DAX measures (TOTALYTD, DISTINCTCOUNT, and CALCULATE for localized Delhi profit tracking). The finalized dashboard highlights strong baseline business health with 432\text{K} in YTD Sales across 500 total orders, driven heavily by the Madhya Pradesh region and high-volume apparel sub-categories like Sarees and Handkerchiefs. To ensure institutional readiness, resolving the filtering issue causing identical 432\text{K} sales figures across product categories and correcting the sheet tab typo from "DASBOARD" to "DASHBOARD" will finalize this project to professional standards.
